

We are offering a highly creative Senior 3D Designer the opportunity to join our growing team.

Job description:

Ignition and Phoenix Wharf are sister agencies, working together to create truly memorable brands and experiences. We pride ourselves on our creative ability, supporting our clients wherever we can across a multitude of sectors including retail, hospitality and exhibition design.

We are looking for a talented and experienced Senior 3D Designer to take a pivotal role within our collective studio.

Your role will include working on a wide assortment of exciting projects for both new and existing clients. As a skilled designer you will have a proven portfolio and be able to demonstrate previous spatial and interior design experience.

You will be involved in the full design process including brainstorming, creative concepting, design development, and detailing. Solid knowledge of the normal packages is a given. For us it's all about the ideas, the raw creativity and an unwavering ability to adapt to a brief.

Acting in a senior capacity you will be a good communicator, able to convey your ideas in an inspiring way and support your work with considered reasoning. You must be a strong creative thinker, have great attention to detail and possess a solid understanding of manufacturing methods and materials.

We're a passionate bunch of creatives with an uncanny ability to self-manage. You must therefore be comfortable organising your time and be happy working autonomously where needed. We don't hide our designers away from our clients, so you should be prepared to attend client meetings to take briefs and to sell your ideas.

Above all else you will share our passion for design and brands. As we grow we need like-minded people who are self-motivated, with an ability (and desire) to bring new thinking to the table and help drive our business forward.

If you are already operating at a senior level or you're looking to take that next step up the career ladder you could be just what we're looking for. Our chosen designer will be based at our Bristol studio and will be given a fantastic opportunity to play a pivotal role within the studio.

Have a look at our websites and see if you are the right designer for us:

Key responsibilities:

- Helping us achieve our goal of becoming a leading South West creative business
- Contributing to all 3D related work going through the company, including the creation of inspirational concept presentations and supporting design rationales
- Employing proven “hands-on” experience working on projects across 3D design in branded consumer environments, including exhibitions / trade shows, retail and hospitality design
- Thinking strategically and producing the stunning creative needed to win projects
- Leading projects from inception through to final delivery, demonstrating solid concepting skills and an ability to develop designs based on client feedback / budgetary constraints
- Being an expert in industry leading software (Adobe Creative Cloud, Microsoft Office, SketchUp, AutoCAD / Vectorworks)
- Mentoring and overseeing the personal development of more junior team members, inspiring them to push their creative and technical ability
- Supporting other senior members of the team and client services with pitch / new business work
- Working closely with the Group Creative Director to ensure projects are always on brief, commercially viable and pass through the studio on time and within budget
- Helping to create design estimates, new business proposals and assisting with scheduling of projects within the studio
- Understanding the full design process and demonstrating a solid understanding of manufacturing methods & materials
- Detailing approved concept work where necessary for costing and final production purposes
- Building relationships with our production team, collaborative partners and supply chain, overseeing the considered and successful execution of projects
- Acting as a primary 3D design contact for our new and existing clients, attending meetings to take briefs, present work and receive feedback
- Understanding & challenging client needs, producing measured and inspiring creative responses
- Interpreting client feedback, amending iterative and final designs to gain full approval
- Working closely with our graphic and design development teams to ensure consistent work on cross-discipline projects
- Being ardent about your own development, striving to bring current / future thinking to the table
- Being highly motivated, keen to make a difference and play an integral part in the business
- Performing consistently and reliably with a willingness to increase professional responsibilities, skills and understanding of broader market issues
- Managing your time and work effectively
- Ensuring you are up to date with the latest trends and being an inspiration to those around you

We offer:

- Diverse range of clients & projects
- Competitive starting salary based on experience
- Employee bonus of 10% based on business performance
- Training and personal development opportunities
- 25 days holiday per year
- Pension
- Life Assurance set at 2 times your salary
- Flexible working

Please apply with a cover letter stating why you are the one for us, an up to date CV and examples of your most recent work to: chrisgwyther@phoenix-wharf.com
